PERSONAL PROJECTS

Capstone project - Pollution Monitoring System [🔗](#)

- Developed an IoT based pollution monitoring system.
- Collects data using many different sensors and stores the data in a database.
- Developed an cross-platform application, which shows interactive map and respective sensors data of that location based on timestamps.
- Alarms users through notifications if any sensors values are beyond threshold limit of a location.

Project BoreWells

- Idea is to have a single source of all borewells with geo location, images and condition like closed or wide-opened, under use or not.
- such that officials or people can take appropriate decisions regarding that borewell.
- Designed a web portal using React and Firebase as Backend.

ACHIEVEMENTS

DXC Collaborators award for HY21
